Summary

Programmer with more than four years of experience generating code for companies in the marketing sector. Implemented improvements in the DATAMARKETINPLUS PBX, which increased its production to 60%. The integrations of the company's management systems helped to reduce the redundancies in the operation and with this the processes now have a better flow. The automation of management indicators is now a tool that generates timely information for the company for decision making.

Specialist in problem solving and teamwork

Experience

Estudio Juridico Medina y Asociados
